Technical Skills

Languages: JavaScript, TypeScript, Python, SQL, Swift

Frontend: Vue 3, React, Angular, TypeScript, HTML, CSS, SPA Development

Backend: Node.js, RESTful APIs, ASP.NET, PHP (Laravel), NPM Package Development

Databases: PostgreSQL, MySQL, NoSQL, Database Normalization, Schema Design 3rd Normal Form

Cloud & DevOps: AWS, Automated Deployment Pipelines, CI/CD Concepts

Tools & Methods: Cursor, Codex, Git, Scrum, Agile Development, Stakeholder Demos

Certification: Professional Scrum Master I, Scrum.org

Education

Brigham Young University — Provo, UT

Master's in Information Systems | Awarded April 2026

GPA: 3.88

Relevant Coursework: Data Structures and Algorithms, Python, JavaScript, TypeScript, React, Web Development, AWS, Swift/SwiftUI, Data Engineering, Project Management, Cybersecurity, Penetration Testing

Bachelor's in Information Systems | Awarded April 2026

GPA: 3.94

Academic Scholarship: Jan 2021 – Dec 2024

Relevant Coursework: Python, JavaScript, ASP.NET, SQL, Networking, Data Analytics, Systems Analysis and Design, Cybersecurity

Professional Experience

English Language Center, Brigham Young University — Provo, UT

Web Developer | May 2024 – May 2026

- Refactor and modernize a testing platform from a Django/React architecture to a JavaScript, Node.js, and Vue 3 stack to improve maintainability and long-term scalability.
- Normalized and simplified the application database schema, reducing complexity from 60+ tables to approximately 30 tables while preserving core testing and rating functionality.
- Implemented an automated deployment pipeline to improve release consistency and reduce manual deployment steps.
- Trained a new developer in single-page application architecture, Vue 3 patterns, and front-end development workflows.
- Initiated regular product demos with stakeholders to gather feedback, clarify requirements, and align technical development with user needs.
- Built and maintained RESTful API services supporting testing workflows, student responses, ratings, and administrative tools.

Intermountain Health, Heredigene — Remote / Salt Lake City, UT

Backend Software Developer Intern | May 2023 – Mar 2024

- Developed an internal NPM package of shared utilities used by 40 services supporting Heredigene engineering workflows.
- Investigated, diagnosed, and fixed backend bugs reported by users and internal teams.
- Completed a two-month backend project enabling upload support for new genetic data types.
- Collaborated with engineers to improve service reliability, code reuse, and maintainability across internal systems.

BYU Store — Provo, UT

Sales Associate, Student Lead | Aug 2021 – Apr 2023

- Trained and supported student associates in customer service workflows, checkout procedures, returns, and store operations.
- Assisted customers, handled returns, maintained merchandise displays, and supported daily retail operations in a high-traffic campus environment.
